Re: Dam Safety Modifications for Lake Burnt Mills Dam

Dear Residents, Business Owners, and Property Owners:

The City of Norfolk's Department of Utilities is in the process of hiring a firm to construct improvements to the Lake Burnt Mills Dam structure. Construction will begin in April 2006 and end by May 2008. The Lake Burnt Mills public boat ramp will be temporarily closed to public access during construction. When this project is complete, there will be an improved parking area for boating access to Lake Burnt Mills.

As part of this project, we will lower the water level by as much as twelve feet to allow for construction of the improvements. If you have a boat along the shoreline and would like to remove it from the lake, it would be advisable to do so before February 2006 when the ramp will become unusable. Once the project is complete, the lake will return to the normal water level as weather permits.

We realize that this construction will cause some unavoidable inconveniences, and we will make every effort to minimize them. The City will have a Construction Inspector on-site for the duration of the project to ensure work quality and to minimize inconveniences to residents, business owners, and property owners. Our inspector can be reached at the site when the contractor is working. Mr. David Rosenthal is the project manager and can be reached at 441-5678 if you would like to discuss the project.

Thank you for your patience while we construct improvements to the Lake Burnt Mills Dam. We are committed to working closely with you to minimize the inconveniences associated with this important project.

Sincerely,

Kristen M. Lentz, P.E.
Director of Utilities
